## commands:

vi "filename" --> opens file

after file openned pressing "i" key enters the instert mode

in file, pressing "x" deletes word.

for saving the file press esc to enter command mode then write :wq

Also, we can access the file with command mode;

 $vi\ -c\ ''\ 'startline number'\ ,\ 'endline number'\ s/\ 'word to change'\ /\ 'word we want'/g|wq''\ file name$ 

example: vi -c "13,13s/berkay/berkay2/g|wq" log.txt

vi -c "13,15s/berkay/berkay2/g|wq" log.txt
